

HOMOEOPATHY NOTES

DERMATITIS

Major remedy whether it is allergic type or moist eczema.

Sulphur (tablets) or you could use Psorinoheel as drops, (quite high dosage of S) in the more acute dermatitis, in which histamine plays the major role for the inflamed tissue.

1. Belladonna Hom. inj (2-3 times a week)

2. Apis inj ditto

3. Traumeel inj ditto

Basic remedy for all dermatoses the same as Sulphur is in the inj therapy:

Cutis Compos. (1-2 times a week)

sometimes worsening at the beginning which is a good sign.

Chronic Dermatitis

Skin is the most important reaction organ (elimination? through the skin) detoxification of liver function whether Hepeel tabs daily or Hepar Compos inj 1-2 times a week (at least once a week)

Major remedy: Sulphur and Graphites (we are using Graphites Cosmoplex as tabs) otherwise Graphites inj 1-2 times a week.

Major remedy again Cutis Compos (1-2 week) together with Coenzyme Compos (blocked enzymatic system in degenerative diseases, as well as defective enzyme functions)

Also in chronic cases Traumeel tabs (regenerative of the sulphide enzymes)

-Arnica inj additional for a severe reddening of skin.

in severe cases with loss of the defence system, Galium Heel inj or drops.

Dosage:

Tablets: small dog or cat: 0.5 tab twice a day (must be crushed together with water diluted in a syringe) directly taken in the mouth without food; no food to be given 10 mins before and after. Resorption over the mucocutaneous membrane.

large dog: 1 tab twice a day

Drops: small dog or cat: 5-6 drops twice a day

large dog: 10 drops twice a day

Injections: small dog up to 10Kg 0.8ml - 1.0 ml

cat 0.4ml - 0.6 ml

big dog 1 - 2 ml

KIDNEY FAILURE: GENERAL TREATMENT

Reneel: nephritis, nephrolitis, inflammatory diseases in the region of the urinary passages

Dosage: Cat & Small Dog: 0.5 tab twice a day

Big dog 1 tab twice a day

for 21 days then recheck blood.

Additional therapy:

Injections:

Solidago Comp for nephritis & nephrosis with idiopathic condition with albuminuria
(strong dose) cat & small dog 0.5 - 0.6 ml twice a week
big dog 1ml twice a week

Chelodonium: detoxification
once a week: dosage above

Apis Hom 1ml once a week

Coenzyme Comp 1ml once a week
blocked enzyme system in chronic cases

Albumino Heel albuminuria, acute and chronic glomerulonephritis, nephrotic diseases
same dosage like Reneel, can be taken together.

Major single remedies:

after improvement with combined remedies try to put the animal on a single remedy.

Berberis: low potency at the beginning, D6 - D12 (Reneel contains Berberis) subacute and chronic cases, protein high, crystals, leucocells, white bloodcell changes.

Apis Mellitica D12 - D32 acute & sub acute nephritis protein in urine

Solidago D2 strongest remedy for kidney failure. nephritis & nephrosis, with hydropic condition and albuminuria, dark mucosanguineous urine with thick sediment quite often associated with eczema

Merc Sol D12 - D30 Urine: bloody mucus, protein raised white & red blood cells risen

Flor de Piedra D6 - D12 major remedy for liver, kidney failure also external poisoning

Arsinica Album D12 Glomerulonephritis nephritis, quite often conjunctivitis; anxiety & depression dominate the clinical picture, eczema, drinks small amounts of warm water frequently, geriatric dog

Dosage: 1 tablet twice a day in low potency - after 21 days change to higher potency.

LIVER DISEASE:

Hepatitis acute and chronic

Hepeel: tab for primary & secondary functional disorders of the liver, damaged liver.

Dosage: cat/small dog 0.5 tab twice a day

big dog 1 tab twice a day

Hepar comp inj Stimulation of the detoxifying function of the liver, hepatitis, cholangitis, in functional disorders of the liver of toxic origin.

Often in liver diseases seen: off food to raise the appetite. Single remedy: **Nuxvomica** D12 1 tab once a day to twice a day for 1 - 2 weeks.

If the appetite is down - Lycopodium D12 Nux vomica & Lycopodium can be taken together in the acute stage
cat/small dog 1ml three times a week (acute) chronic: 1 - 2mls 1 - 3 times a week
big dog up to 2 mls

Chelidonium inj Disorders of liver and gall systems, spastic process in acute intestinal diseases, cholangitis, hepatitis, catarrhic diseases of the mucosae.

PANCREATITIS

Duodenalheel: 0.5 tab twice a day (cat/small dog)

Chelidonium: drops: 6 drops twice a day (cat/small dog).

The above can be given together

Injection therapy:

Momordica comp: regulation effect in pancreatitis and disturbance of the pancreatic function.

0.5 - 0.7 ml twice a day for 4 weeks (cat/small dog)

1 - 1.4 ml twice a week for a big dog

Leptandra comp: chronic diseases of the liver and pancreas, same dosage as above once a week

CONJUNCTIVITIS acute & chronic:

Oculoheel: conjunctivitis, blepharitis (particularly chronic form)

0.5 tab twice a day for 3 weeks (cat/small dog)

1 tab ditto big dog

Mucosa comp: Stimulation of the bodily defences in diseases of the mucous membranes and cataracts of various type and located upper & lower parts of the respiratory tract - particularly conjunctiva.

Should be given in chronic cases 3 times a week (minimum twice a week)

cat/small dog 1 ml

big dog 2 ml

dosage increase causes no problem, also as a supportive treatment could be given:-

Traumeel tab (antiphlogistic, antisuportative action)

major remedy for chronic eye problem (chronic inflammation)

1. Euphonia? D2 - D12 low potency

2. Arj nitricum D6 - D30

ARTHRITIS

Traumeel inflammatory traumatic degenerative diseases of the joints.

as drops: 6 drops 3 times a day small dog/cat

10 drops 3 times a day big dog

or tabs: 0.5 tab 3 times a day and 1 tab 3 times a day

Principal effects of traumeel:

1. Antiphlogistic for tendovaginitis, styloiditis, epicondylitis, scapulohumoral, peri-arthritis, arthrosis of the hip, knee & small joints.

2. Regenerative

3. Anti - exudative

& adding zeel (more chronic cases)

Zeel tab

Arthrosis in particular gonarthrosis, polyarthrosis, spondylarthrosis, scapulohumoral peri-arthritis- same dosage as traumeel.

Osteoheel:

- cases with pain
- worsening in cold weather
- clicking joints
- Ostitis, periostitis
- Osteochondrosis?
- acute cases

cat/small dog begin in 3 w: 0.5 tab twice a day, later 0.5 once a day

Rhus tox D30

good combined with Osteoheel

begin 1 twice a day, later 1 tab once a day

- cold, wet weather
- after movement limping or stiffness gets better

Viscum Album D6

- old animal
- stiffness general
- most big & overweight animals

Hekla Lava D8 - D12

- Hip dysplasia
- Exostosis

Calc Flor D12 - D30

- chronic cases
- concerning ligament attachment

Calc phos

- acute cases

Ruta

- damage from periost and ligament attachment
- after movement better
- worsening through cold & wet weather - good combination with Rux tox

Neg chondrin and Neg arthros

- especially cartilage damage - fresh cells to stimulate chondrocytes, diffusion of cartilage better, very effective. Should be taken together - course in drop form for 1 month.

Vermiculite

- arthritis, limping dog, mostly front leg

WOUND NOT HEALING

1. Traumeel
 - a. inject around the wound or incision.
 - b. good post-op - better healing -
 - c. inflammatory processes like abscesses, phlegmons?, dermatitis?, nephritis?

2. Arnica

acute (sub) chronic inflammation of a localised or generalised nature

Traumeel & Arnica can be mixed together 1 ml of each directly around wound or s.c.

3. Belladonna

localised inflammatory - hyperaemic processes also all three can be taken together.

4. If wound is still not healing, Silicea inj e.o.d. or tab Silicea D12

5. Extremely bad healing wound: tarantula cumbensis as powder on the wound or inj form.

Always Echinacea comp once a week to increase the mesenchymal defences, inflammation of any kind and location.

BRONCHITIS WITH DYSPNOEA, COUGH

Tartephedreel: drops

Catarrh of the respiratory tract: laryngitis, trachealitis, bronchitis: coughs

6 drops twice daily cat/small dog

10 drops twice daily big dog

Dropeteel tabs

Bronchitis of various origins, also in particular, as adjunct in congestive bronchitis, cough, (with mucus accelerated)

Bronchiatis heel tabs

for cough, bronchitic asthma, bronchiolitis with deficient expectoration, inflammation of serous membranes.

Injection therapy:

Phosphor inj 1 ml once a week

bronchopneumonia, pharyngitis?, affections of the parenchymateous? organs.

Carbo vegetabilis 1 ml once a week

can be taken together

Aconite tab D30 - D200

Dyspnoea

INFLUENZA

Gripp heel tab: 1 tab 3 - 4 times a day

inj: 1 - 2 ml e.o.d.

for influenzal infection

Euphrasium comp inj (or drops)

for acute and chronic sinusitis, tubal catarrh, rhinitis?, catarrh of larynx and bronch, cat flu.

small dog/cat 1 ml

dog up 2 ml

ALWAYS ADD:

Echinacea comp inj

stimulation of the body's defence system, in fever and any inflammation like abscesses, granules?, phl ?, gingivitis, sinusitis, gastroenteritis, enterocolitis?, cystitis?, ryeletis?, vaginitis, otitis, skin diseases, cat flu, delayed recovery period.

cat/small dog 1 ml

dog 2 ml

Echinacea cosmoplex

inflammation drops, also for stimulation the body's own defence mechanism in cases of localised inflammation.
