Immuno-Care**

## Research Shows:

A randomised, double blind, placebo controlled clinical trial at the University of Guelph showed that Immuno 300™ can have a beneficial effect on immune parameters. The clinical trial showed a reduction in basophils that release histamine typically found in allergic reactions, and also in Interleukin-6, the cause of inflammation and pain.

High levels of Interleukin-6 are found in many common immune conditions

The study also verified that Immuno 300™ can reduce circulating levels of LDL cholesterol and may increase circulating levels of HDL cholesterol.

Urologists in Germany have been using phytosterols for the treatment of enlarged prostate conditions for over 20 years.

**Suggested Dose:** Take 2 capsules per day, one morning and one evening for the first 7 days, followed by 1 capsule per day thereafter on rising. Take with water 30 minutes before eating, or 2 hours after eating, or as directed by your health practitioner.

More serious conditions may require 2 capsules per day, one in the morning and one in the evening.

DO NOT CONSUME WITH MILK

**CAUTION:** If you are pregnant, nursing, diabetic, taking medication or under a physicians care, consult your doctor before taking this supplement. **ORGAN TRANSPLANT RECIPIENTS MUST NOT TAKE THIS SUPPLEMENT.** Keep out of reach of children.

Immuno 300™ Patent # 2,402,429	Amounts per serving
Serving size	1 capsule
Total Phytosterols	300 mg
Beta Sitosterol	117 mg
Enzogenol™	20 mg
Cellasate™	50 mg

**IMMUNE 300™:** Is manufactured in Canada exclusively for CELT NATURALS in a G.M.P. approved facility.

## Natural Support for a Strong Immune System

# Immuno 300™

Your immune system is exceedingly important and complex, and with the current bombardment of pesticides, herbicides and above all radiation, it needs all the help that it can get! A multi-vitamin alone simply won't cut it. Nature has provided a broad range of nutraceutical compounds to help your immune system do its job and do it better!!!

Strange diseases and unusual viral strains not seen several decades ago now plague our society. People are looking for solutions. Preventing disease and taking charge of your health makes sense. Make Immuno 300™ "Your Foundation for Health".

## SOME IMMUNE SYSTEMS NEED HELP.....

The immune system has so many built-in fail-safes that, in theory at least, we should rarely fall ill. But, in fact, we do. Harmful agents can baffle our defenses. The system can simply be overwhelmed by the number and toxicity of viruses, bacteria, or other foreign cells and toxins.

Sometimes the gatekeepers of the system go crazy, mistaking a basically inoffensive intruder such as pollen, dust, or a bit of bee venom for an enemy and causing the body to go into the red alert known as an allergic reaction. In addition, the immune system can mistake the body's own cells and tissues for "nonself" and attack them, as in auto-immune diseases that cause symptoms of stiffness, pain and inflammation.

- **Seasonal Allergies**, can elicit a host of symptoms that can be very uncomfortable to deal with. They include, sneezing, watery eyes, runny nose, itching, blurred vision, cramps, joint and muscle pain, and fatigue to mention a few. Allergies are not just a seasonal irritant, many illnesses, including autoimmune disorders and inflammatory diseases are associated with, or arise from, years of untreated allergy symptoms.

- **Colds & Flu:** That never seem to go away.
- **Persistent Aches & Fatigue:** is basically a symptom that can occur with any autoimmune disease. Pain is often in the neck and in shoulder muscles extending down the back. Pain can be in the joints and muscles also.
- **High cholesterol:** Consumption of phytosterols 15 minutes prior to a meal helps block the intestinal absorption of cholesterol. Recent studies have shown that both phytosterols and Enzogenol can assist in reducing LDL, and in increasing HDL levels. In fact, the US FDA issued a rare ruling allowing the health claim that foods containing plant sterols may reduce cholesterol levels. This is only the 12th time the FDA has allowed such a claim.

## What Sets Immuno 300™ Apart?

Few supplements have been specifically designed to be absorbed and retained by the body. Many are destroyed by the stomach acids.

**Immuno 300™ capsules are enteric coated, which enables them to avoid destruction by the stomach acids.** They also contain a unique component, Cellasate that has been specifically designed to facilitate retention and absorption.

## A ONE A DAY dietary supplement containing: Enzogenol™

- Discovered at the University of Canterbury, New Zealand, contains the most comprehensive complex of natural antioxidants yet discovered
- Is harvested using a pure water extraction process which inflicts no harmful effects on the environment, nor leaves harmful residues in the product
- Is an active scavenger of free radicals activated by ingested carcinogens

## Phytosterols

- Extracted from soy (NOT WOOD PULP), and produced in N. America
- Contains 300mg phytosterols, the recommended daily intake.
- Have been shown to modulate the immune system

## Cellasate™

- An essential fatty acid complex designed to enhance the absorption and retention of the phytosterols and anti-oxidants within the body.
- No other supplement includes this proprietary complex.
- Has a strong influence in balancing the immune system, especially in people with allergies and immune disorders
