

**Jack Davidson &
Alan Fergusson,
the developers of
Immuno-Care**

Many new and innovative products evolve from personal needs, and Immuno-Care is a very good example.

Immuno-Care was developed as a natural support for the immune system. It is used by Jack and Alan and their families to support their immune systems, and to help to protect them from the serious diseases that seem to be gaining prevalence in to-days society

From the conception of Immuno-Care we have had two primary aims:

- **To provide a product using the highest quality components available**
- **And, above all, to improve the quality of life of people experiencing debilitating diseases, for then we can truly say “we have made a difference”**

Suggested Dose: Take 2 capsules per day, one morning and one evening for the first 7 days, followed by 1 capsule per day thereafter on rising. Take with water or fruit juice 30 minutes before eating, or 2 hours after eating, or as directed by your health practitioner.

More serious conditions may require 2 capsules per day, one in the morning and one in the evening.

DO NOT CONSUME WITH MILK

CAUTION: If you are pregnant, nursing, diabetic, an M.S. patient, taking medication or under a physicians care, consult your doctor before taking this supplement. **ORGAN TRANSPLANT RECIPIENTS MUST NOT TAKE THIS SUPPLEMENT.** Keep out of reach of children.

Immuno-Care™	Amounts per serving
Serving size	1 capsule
Total Phytosterols	300 mg
Beta Sitosterol	117 mg
Enzogenol™	20 mg
Cellasate™	50 mg

IMMUNO-CARE™: Is manufactured in Canada exclusively for CELT NATURALS in a G.M.P. approved facility. For further information, call **1-800-250-8024** or write Box 48-235, Calgary, Alberta, Canada T2X 3C9.

Immuno-Care™

**Natural Support
for the
Immune System**

Immuno-Care™

Your immune system is exceedingly important and complex, and with the current bombardment of pesticides, herbicides and above all radiation, it needs all the help that it can get! A multi-vitamin alone simply won't cut it.

Nature has provided a broad range of nutraceutical compounds to help your immune system do its job and do it better!!!

All autoimmune diseases share much in common. Research on any particular one can often apply to the understanding of other autoimmune diseases. They all have similar underlying causes and conditions.

SOME IMMUNE SYSTEMS NEED HELP.....

The immune system has so many built-in fail-safes that, in theory at least, we should rarely fall ill. But, in fact, we do. Harmful agents can baffle our defenses. The system can simply be overwhelmed by the number and toxicity of viruses, bacteria, or other foreign cells and toxins.

Sometimes the gatekeepers of the system go crazy, mistaking a basically inoffensive intruder such as pollen, dust, or a bit of bee venom for an enemy and causing the body to go

into the red alert known as an allergic reaction. In addition, the immune system can mistake the body's own cells and tissues for "nonself" and attack them, as in auto-immune diseases that cause symptoms of stiffness, pain and inflammation.

- **Seasonal Allergies**, can elicit a host of symptoms that can be very uncomfortable to deal with. They include, sneezing, watery eyes, runny nose, itching, blurred vision, cramps, joint and muscle pain, and fatigue to mention a few. Allergies are not just a seasonal irritant, many illnesses, including autoimmune disorders and inflammatory diseases are associated with, or arise from, years of untreated allergy symptoms.
- **Colds & Flu**: That never seem to go away.

- **Persistent Aches & Fatigue**: is basically a symptom that can occur with any autoimmune disease. Pain is often in the neck and in shoulder muscles extending down the back. Pain can be in the joints and muscles also.
- **High cholesterol**: Consumption of phytosterols 15 minutes prior to a meal helps block the intestinal absorption of cholesterol. Recent studies have shown that both phytosterols and Enzogenol can assist in reducing LDL, and in increasing HDL levels. In fact, the US FDA issued a rare ruling allowing the health claim that foods containing plant sterols may reduce cholesterol levels. This is only the 12th time the FDA has allowed such a claim.

GIFTS OF NATURE Two of Nature's gifts that support a healthy body are a complex of flavonoids derived by the University of Canterbury in New Zealand from a particular species of pine tree, and phytosterols that the University of Natal in South Africa found could be derived from plants and seeds. The body cannot make or store phytosterols, and an insufficient dietary intake can result in deterioration in health.

A third gift, Cellasate, is a combination of natural products that encourages the body to absorb these nutrients, rather than allowing them to just pass through.

WHAT SETS IMMUNO-CARE™ APART?

PHYTOSTEROLS

Phytosterols can modulate both an under producing and an over performing immune system, and consequently alleviate symptoms of stiffness, pain and inflammation. This balancing effect may enhance the ability of the T-lymphocytes to release the factors that ultimately regulate cellular functions in the body.

Studies have shown the potential to increase T- cell proliferation on average by 58%. Increases in CD-4 lymphocyte counts have also been reported by some people.

ENZOGENOL™

Enzogenol™ is a powerful formulation of anti oxidants derived from the bark of selected pine trees, which contain the most comprehensive complex of natural antioxidants yet discovered. The **patented extraction process* uses only pure water**. This ensures a number of significant groups of antioxidants are harvested, and not lost as in the conventional solvent based process. For the technical, the extraction process produces the highest molecular weight oligomeric proanthocyanidins in the industry. The antioxidant values are *significantly more* than any other plant based antioxidant supplement currently on the market. The powerful antioxidant profile of **Enzogenol™** increases the body's ability to fight disease, illness and infection at the cellular level.

*Developed by the University of _____ in New Zealand.

CELLASATE™

Cellasate™, is a blend of fruit extracts, oil producing seeds, essential fatty acids derived from North Sea fish. This unique blend increases the bioavailability of the phytosterols and antioxidants. **Cellasate™** also functions as a beneficial immune modulator.

Enzogenol™ is a registered trademark of Enzo Nutraceuticals, New Zealand.
Cellasate™ is a registered trademark of Celt Corporation, Canada.
