**WHAT PEOPLE ARE SAYING
ABOUT IMMUNO300™
AND
ALLERGIES**

- Thank you Immuno300 for giving me an allergy free summer. I have been under the gun for years suffering from runny nose, red itchy eyes, aching joints and a feeling of always being tired. I have had no relief from the over the counter drugs and my doctor has been unsuccessful in treating my condition. I tried Immuno300 and with in 24 hours I was symptom free. I thought it was a fluke but I remained symptom free after 2 weeks and I knew I had found a winner. I only take one a day and it is so convenient I intend to remain on it especially through the allergy season. J.D. Calgary
- I used to have moderate asthma and allergies to dust and animal hair. I would have frequent attacks that would make my eyes itchy and watery and my nose would run almost constantly. After seeing my naturopathic doctor and starting the Immuno300 my asthma attacks are less severe and less frequent. I have little or no allergic reactions any more. I have increased energy and an improved sense of well-being. J.F. Edmonton
- I used to have a chronically stuffed nose that would drip constantly. I would be so stuffed up that I would snore at night and wake up my husband. The doctor told me years ago that it was due to allergies to dust mites. After 1 bottle of Immuno300. I seemed to be totally cured! I was amazed at how well it worked. Even my naturopathic doctor was surprised at how well it worked. I rarely have a stuffy nose I take the Immuno300 for a few days and I'm clear again. I only have to take it a few times a month now. I don't get sick as often and I'm glad about that. This stuff really is amazing! S.P. Alberta
- I had allergies to pollen and other seasonal allergies. I would get itchy eyes, lots of sneezing, and it would really tire me out. After a couple of weeks on the Immuno300. I had a dramatic reduction in ALL of my allergic symptoms. Now they are not a problem anymore, and I don't have to worry about that time of year coming again. J.C. Edmonton

ASTHMA

- I am a health storeowner who had suffered with asthma for many years. I have been using drugs and inhalers for a long time and upon carrying the product in my store, I decided to try it for my asthma. After 3 months it was gone and I decided to wait another 2 months to make sure it wasn't a coincidence. I can say with out a doubt that Immuno300 is the reason I have no more asthma symptoms and I am proud to be carrying this in my store.

Asthma cont.

- J had been on a steroidal inhaler for 3 years (for those of you who don't know this is a hard-core and much overused drug that has pretty unpleasant side-effects if used long term-including osteoporosis and immune suppression). She was on another inhaler (ventolin) that she used up to 2-3 times per day. She had food allergies. Her nose was always stuffed up. She had itchy eyes and a runny nose a lot of the time. She would sneeze for 30 minutes when she woke up every morning. She took antihistamines daily to manage these symptoms. Within 2 weeks of being on Immuno300 she was off the antihistamines and her stuffy nose was completely gone. Her asthma progressively improved. She caught a cold and it only lasted 2 days (before it would have gone on for 2 weeks). She was able to eat foods that she couldn't eat before without having immediate allergic reactions. Within 2 months of her visit she was completely off her steroidal inhaler and was using the other inhaler only once a day-and this was mostly for very minor chest tightness in response to the cold air outside-she wasn't having any more full-on asthma attacks. She was delighted with the results. She also saved money from not having to buy the antihistamines every month.
JF Edmonton

COLDS & FLU

- Immuno300 has been a pleasant surprise to me. My doctor had prescribed anti-biotics for the last 3 months to get rid of my flu, which had turned into pneumonia. The anti-biotics weren't working. A friend told me to try Immuno300 as he had been using it to prevent colds and flu. I was a little skeptical of it but decided to buy a bottle. To my surprise I took 2 capsules per day and within 5 days I was feeling great and all my symptoms of pneumonia had gone. Would I recommend Immuno300, - you bet. S.C. Alberta

- I have been very stressed lately and have been run down and have had a series of colds and flu that I have not been able to get rid of for months. The flu developed into pneumonia and I have been on anti-biotics which have not worked very well. I was introduced to Immuno300 in a store as being a good product to help my immune system. I decided to try it as I wasn't having much help from my doctor. Within a few days I was starting to feel better and within a week I had recovered. After 2 months on Immuno300 I decided to stop it to see if I needed it, and after a week I was starting to get a cold again. It proved to me that the product works and that my immune system needs more support on a long term basis. I recommend it to anyone needing immune support. C.F. Calgary
- Since I started taking Immuno300 I have not had even a hint of a cold or flu. This is quite wonderful for me to say the least. Before taking Immuno300 I was plagued with one flu after another and sometimes pneumonia. (It would usually depend on the level of stress I had, or how over tired I got). It has made such a great change in my life. Something else I realized was that Immuno300 gives me an all over feeling of wellbeing. Besides that I stopped breaking out in small cuts on my skin. It must have had to do with my immune system being out of kilter. I believe there are other good changes going on in my body that I'm not yet aware of. I am most grateful to the dear people who produced this remarkable product. O.P. Burnaby

DIABETES

- I am diabetic using insulin 3 times per day for the last 12 years. I am also the owner of a health food store and have tried other products. I was introduced to Immuno300 and reluctantly decided to try it. I was taking 50 units a day of insulin, 20 in the morning, 20 in the afternoon and 10 units before bed. After 3 weeks I stopped the night-time units which is a significant drop to me. Some people only take 10 units per day. I have had a 20% drop in insulin use and look forward to a continual decrease. S.H. Edmonton

ECZEMA

- C. had eczema since she was very little. It had been under her armpits on both sides quite extensively for years. She would get eczema on her hands whenever her hands were exposed to any chemicals or detergents (ie doing any cleaning) and even after folding the laundry. She managed the eczema with cortisone

- cream-a few times per week and more when it was bad. I gave her Immuno300 and recommended detoxification and food allergy elimination. After 2 months her eczema was 90% gone (in places where it had been chronic for years) and her hands (which used to be effected almost constantly) were completely clear. She now washes dishes and folds laundry and does things that she wasn't able to do before without getting constant skin rashes. The best thing is that she doesn't need to use the cortisone cream anymore where she had eczema for years. Her hands and old eczema areas remain clear to this day. CB-Edmonton

FIBROMYALGIA

- I am able to enjoy life once again thanks to Immuno300. My problems began back in 1996 when I went through a series of crisis events. I lived with daily unbearable body pain, severe headaches, insomnia and depression which lead to an inability to lead a normal life. I was finally diagnosed with fibromyalgia. I remember being in such severe pain that I felt I just could not make it for another day. That's when I was introduced to Immuno300. I began to faithfully take one capsule one hour before breakfast. I was able to almost immediately fall asleep with out the use of sleeping pills awakening the next morning feeling rested. It has now been over three months. I sleep well almost every night and I am virtually free of pain. I would highly recommend Immuno-300 to every one who is struggling with fibromyalgia. It has turned my life around and given me the opportunity to enjoy the life I once enjoyed. TZ Saskatchewan
- I want to thank you for making such a good product that is helping my fibromyalgia and chronic fatigue syndrome. I have been on a competitors product and found that it was not working. I was introduced to Immuno300 by the natural pharmacy I shop at. They advised me to try this product which is much stronger and with other important ingredients to make it work better.

I have been on Immuno300 for only 10 days and I am finding my condition improving by the day. I have been suffering with fibromyalgia for 7 years and no one has been able to do anything for me. I waken 3-4 times per night with severe cramps in my feet and calves. It is so severe I limp for a couple of days after. The condition has worsened as time goes by and since last autumn my pain level got so bad my quality of life went down hill. I have been very depressed and constantly tired with no energy. I have been getting ready to move and knew I

would have to get someone in to help me. To my joy I have been able to pack boxes and move around with great ease.

I notice I have no more leg, hip and knee pain just days after taking Immuno300. I believe that after 3-6 months I shall be free of fibromyalgia.

I recommend to all fibromyalgia patients to try Immuno300. There has been nothing that my doctor has given me that has helped so much. I thank you and your friend for inventing Immuno300. MJT Outremont Quebec.

HEPATITIS C

- I have hepatitis C and it has been a health problem for over a year. After starting the Immuno300 I noticed a huge lift from my usual “sick hepatitis feeling”. After only a couple of days on it I noticed quite a big energy lift. My energy increased steadily for about 2 weeks and it has remained higher ever since. I have more energy consistently and I feel that I am really ahead of my hepatitis for the first time in a long time. Before I felt like the hepatitis was always there, and after stress or activity the hepatitis would come out and I would feel really sick for up to a week. Now when a “bad day” comes I bounce back much more quickly. After a day of rest I am feeling good again and I can have a life more like I used to have. I can stay on my feet much longer than before and my activity level is WAY up. My head feels clearer. I don't get sick as often with colds or flu and if I do get sick I bounce back much faster than I used to. I have tried a lot of supplements and this one has had one of the more noticeable and dramatic effects. I plan to stay on this one for sure! N.P. Edmonton

HIV

- I began using Immuno300 after a recommendation from my naturopath. I have been living with HIV for almost 20 years. Not only have I tried every so called “miracle cure” along way, I have also read most issues of HIV treatment news letters. I was very impressed by the medical research foot noted in the Immuno300 brochure. I enquired of my physician regarding any known interactions with my medication and he believed the product to be safe.

I have experienced a multitude of side effects over the years from HIV and treatments, such as diabetes and lipodystrophy. For a product to be deemed working for me, it would have to show noticeable improvement in some of my

conditions. With my usual skepticism, I began using Immuno300 3 months ago. One thing I noticed was that a lingering cold disappeared in 2 days. Prior to that, I seemed to be experiencing one cold after another. I can honestly say I have not had a single cold since, even though others around me have.

My last blood work of a week ago showed some interesting numbers. My CD-4 level climbed by 300 points! There was also an increase in my total cholesterol which was due to an increase in HDL, the good cholesterol.

I don't expect this product to cure me, but my hope is to rebuild my immune system and lessen some of the side effects of HIV I am dealing with. Thank you so much Celt, your Immuno300 is working well for me.

Sincerely MHS, Toronto, Canada

MULTIPLE SCLEROSIS

- I was diagnosed with MS 10 years ago. I have been on many supplements since then to manage my condition. My naturopathic doctor gave me the Immuno300 and I noticed a big difference within a week. I had increased energy and could do a lot more activity about the house as a result. My thoughts were clearer and my balance was better. I have been on it ever since and it is one of the supplements I plan to stay on. I would definitely recommend this product to someone else. I have definitely noticed a remarkable benefit since taking this. E.H. Edmonton

URINARY FLOW

- I have been suffering with prostate enlargement for some time and thought it was one of those conditions men had to put up with. I was introduced to Immuno300 through a friend and to be honest I had a bottle for some time before I reluctantly decided to try it. To my astonishment and excitement it worked with in a short time, relieving many of the bathroom visits and allowing for increased flow. It also has relieved a lung condition and cough I have had for 20 years. It works and it is easy to take. M.S. Calgary

RHEUMATOID ARTHRITIS

- Rheumatoid arthritis is a condition I have had for a long time. I have been on a series of pharmaceuticals that in themselves are long term debilitating. I was introduced to Immuno300 by a friend. I was unable to sleep in bed for years and had to sleep sitting up, and of course this was not the quality sleep I needed. I tried the product at 2 caps per day and within 2 weeks I noticed a great deal of relief. After 3 months I was weaned off my drugs, back sleeping in my bed and feeling so much better. I ran out of the product and had not bought it for 2 weeks, at which time my condition worsened and I was suffering terrible pain. I immediately went back to Immuno300 and within a week I was feeling relief again. I will never go with out Immuno300 again.
