

Akuport M1+

MEASUREMENT | TESTING

The ideal starting device for the modern bioelectrical impedance assessment procedures; stand alone or expandable in a modular system with the Akuport MT and/or MR2.

The Kindling **Akuport M1+** is a practical device constructed in accord with the newest findings, and provides both beginners and experienced users with a cost-efficient variant. The Akuport M1+ can be used separate or can be expanded easily, either with the stimulation module (Akuport MT) or with the bioresonance module (Akuport MR2). All three Akuport modules yield into the Akuport Tower, which includes all necessary features for your daily business.

Akuport-Tower complemented with Akuport D-tec
